Saksham Dhull

sakshamdhull442@gmail.com

+91 9718227010

Delhi, Kurukshetra

EDUCATION

Bachelor of Technology (B.Tech), Computer Science (2017 - 2021)

IIT Delhi

CGPA : 9.61/10

XII (Senior Secondary), Science

Year of Completion: 2017

CBSE Board (New Happy Public School, Yamunanagar)

CGPA : 9.28/10

X (Secondary)

Year of Completion: 2015

CBSE Board (Hansraj Model School, Punjabi Bagh, New Delhi)

CGPA : 10.00/10

INTERNSHIPS

Human Resources (HR)

Samadhan Abhiyan (Delhi)

May 2018 - Jun 2018

This was an internship under an NGO that helped to spread awareness about Child Sex Abuse. Workshops, Surveys and Walks were conducted for spreading awareness.

POSITIONS OF RESPONSIBILITY

- Member of Robotics Club, IIT Delhi
- Astronomy Club Executive of IIT Delhi

TRAININGS

Deep Learning In Computer Vision

Coursera (Online)

Jun 2018 - Present

This Course consists of deep neural networking for advanced image processing and computer vision

SUMMER TRAINING

Robotics Club, IIT Delhi (Delhi)

Apr 2018 - May 2018

This training comprised of all the tools and methods which are needed in the modern day robotics.

Data Science In Python

DataCamp (Online)

Oct 2017 - Oct 2017

This was a beginner course for introduction to data science in python using numpy, matplotlib and scipy

PROJECTS

CounterTap

Feb 2018 - Feb 2018

https://github.com/Dhull442/CounterTap

This consisted of a basic android app where we can count the taps and tap speed of the user

Shadow Eclipse - Unity3D game

Jan 2018 - Jan 2018

https://github.com/Dhull442/Shadow-Eclipse

This is game made using Unity3D software which works on the principle of light combined with the greek mythology of shadows. This is leve based puzzle game made for the Code.Fun.Do held by Microsoft

Gripper cum Storage Robot

Nov 2017 - Dec 2017

Redesigned the gripping mechanism to implement the storage operation as well and developed a customized acrylic chassis made using laser cutting. Programmed Arduino to enable semi-automation of processes. Demonstrated in Open House, IIT Delhi 2017.

ROS based Differential Drive

May 2018 - Present

https://github.com/Dhull442/ROS-based-Differential-Drive

Designed a PS3 cum ROS based differential drive and Built a gazebo model for the visualization of the robot's motion. Used Computer Vision classifiers along with ML techniques to detect and recognize faces, detect upper body for tracking the person.

Distributed Computing using virtualization

May 2018 - Present

The project compromises of a linux based protocol which will initiate, suspend, migrate and delete a virtual machine, to increase the net computational power of a single stand-alone computer and also save the electricity by shutting the extra ones.

Real Image - Unity3D Game

May 2018 - Present

This is a conceptually new puzzle which defies normal laws of light and allows users to think and play using them. Developing using Unity 3D game engine

OpenCV Python Cheat Sheet

Jun 2018 - Present

https://duck.co/ia/view/opencv_python_cheat_sheet

Developing a cheat sheet for openCV using python on github along with developers all over the globe.

Word Streak

May 2018 - Present

This is a word based game being developed using Android Studio and having a SQL support for storing data.
